

WHAT IS A MODERN DRILL AND BLAST MANAGEMENT SYSTEM?

Modern drill and blast management systems give you a digital and holistic understanding of your blasting world.

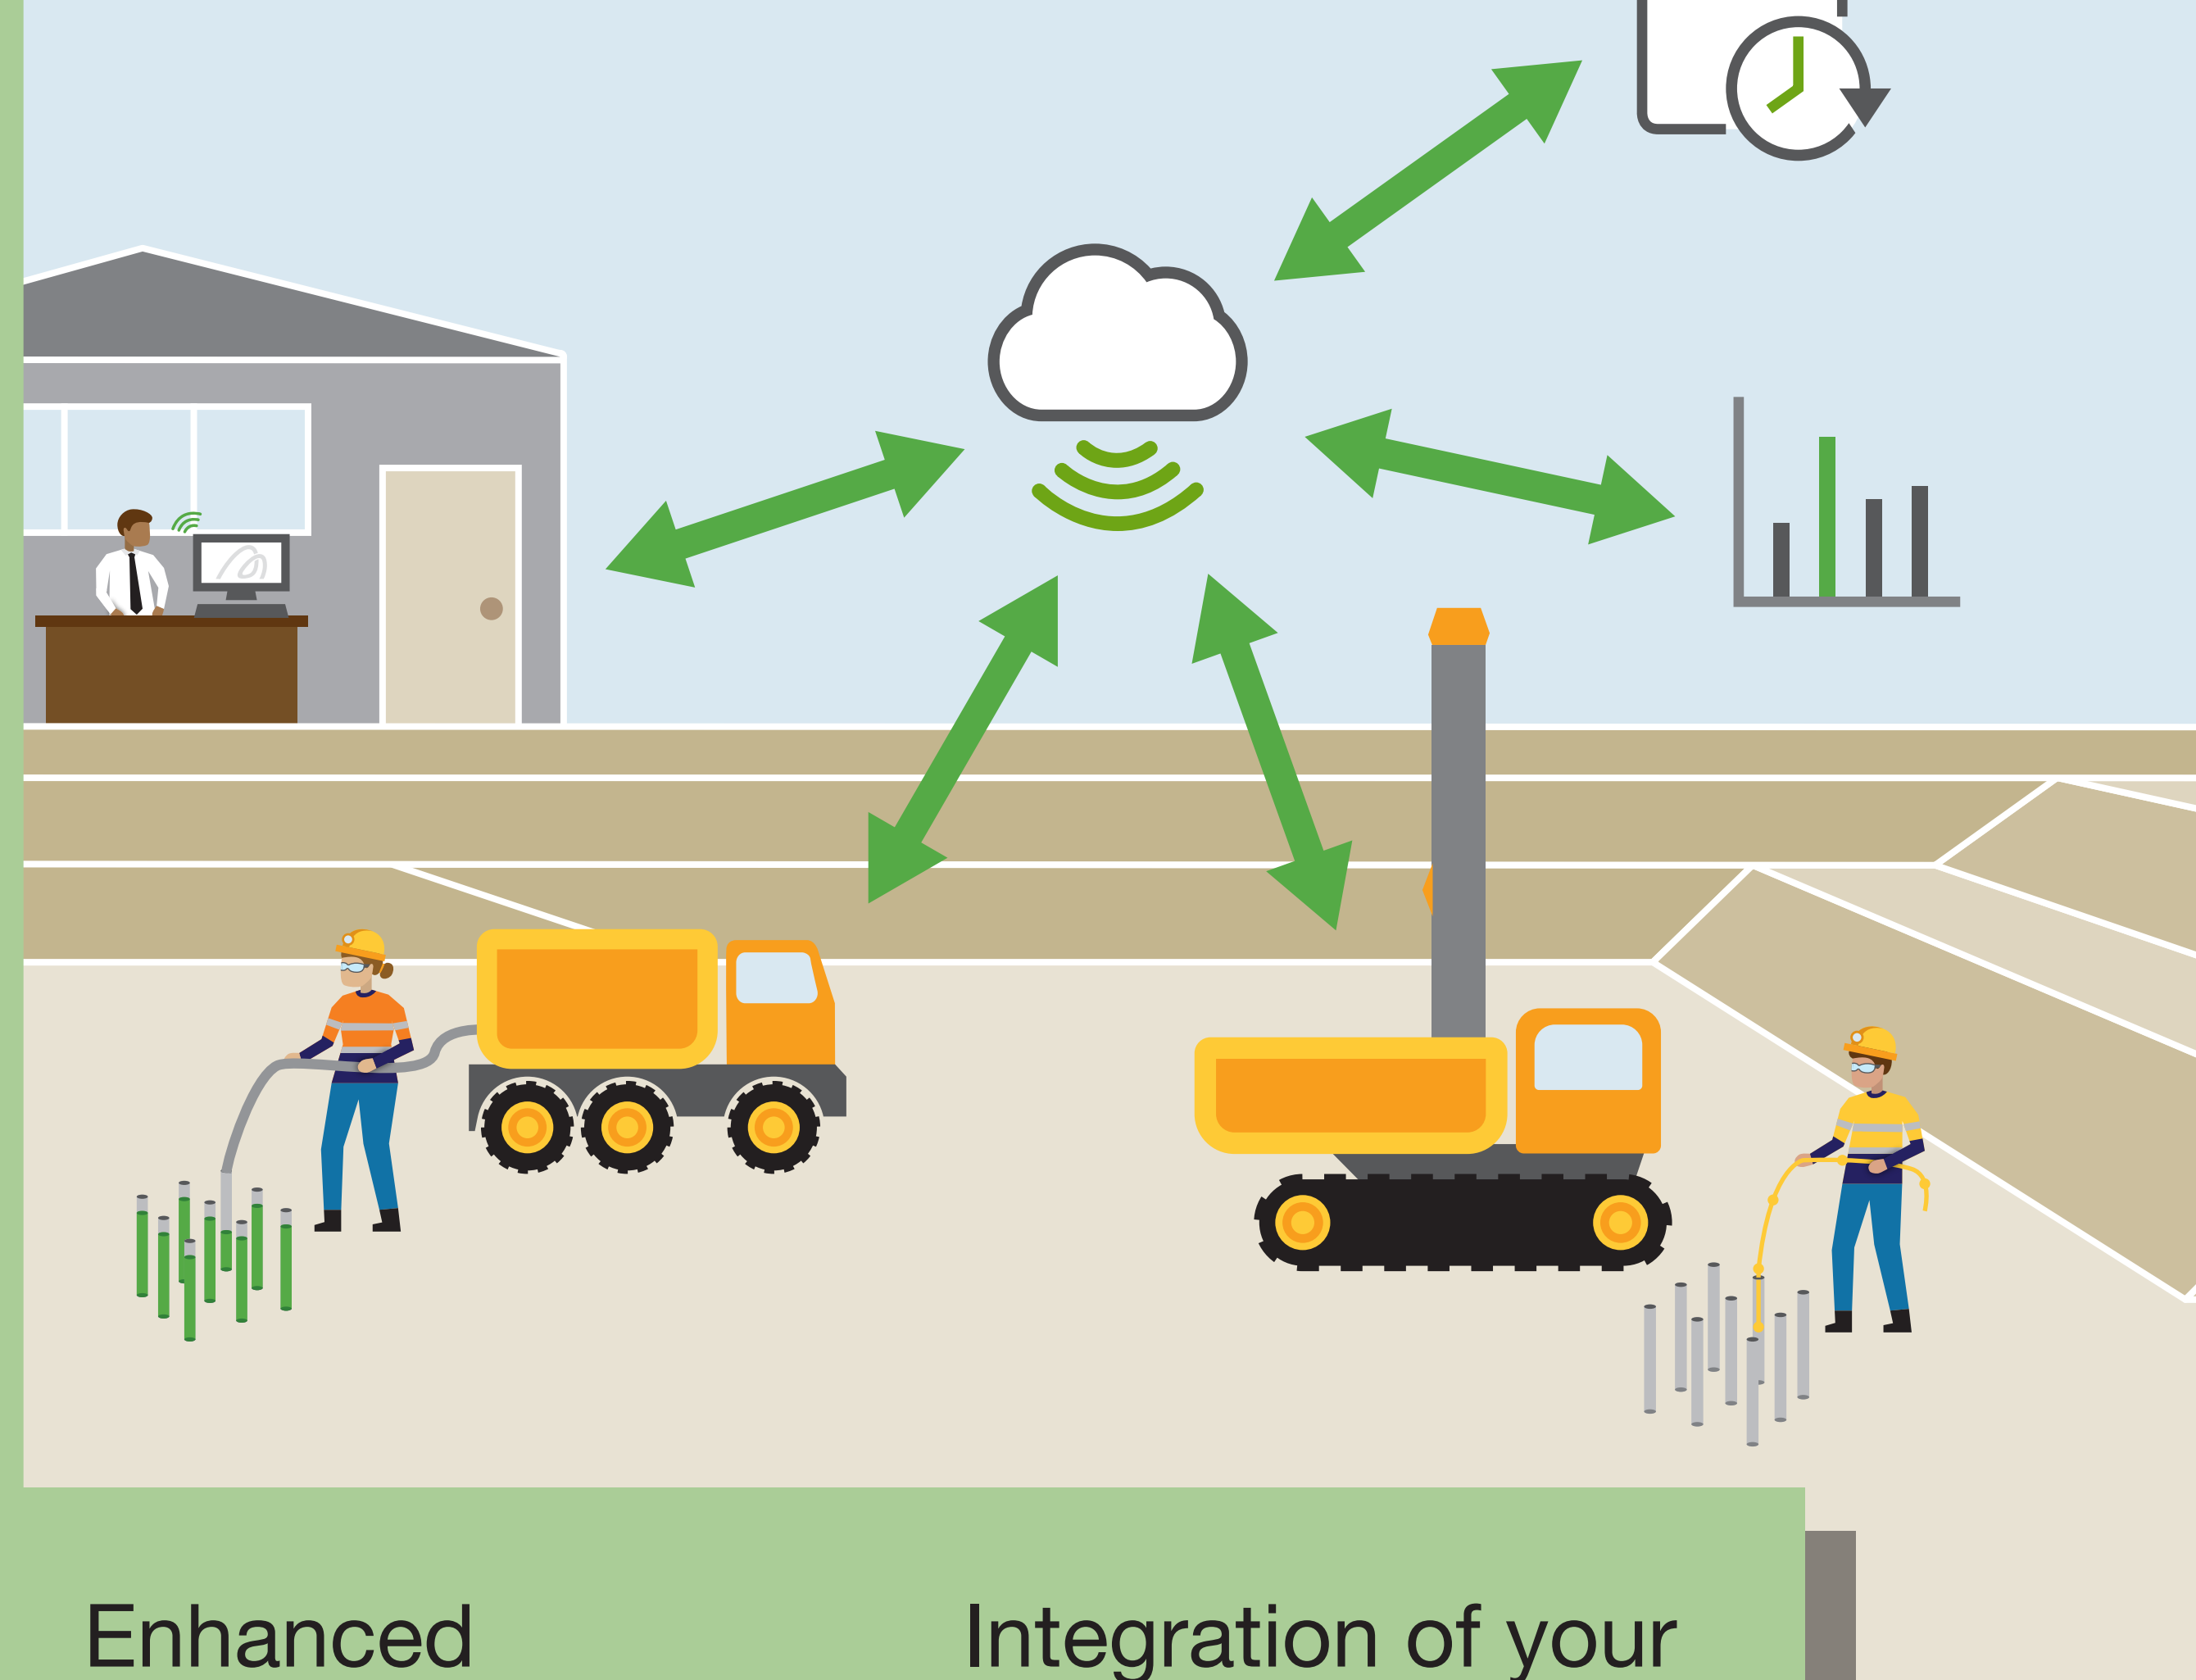

They provide:

A single source of truth

One central software for your drill and blast data makes visualization of the whole process possible and easy.

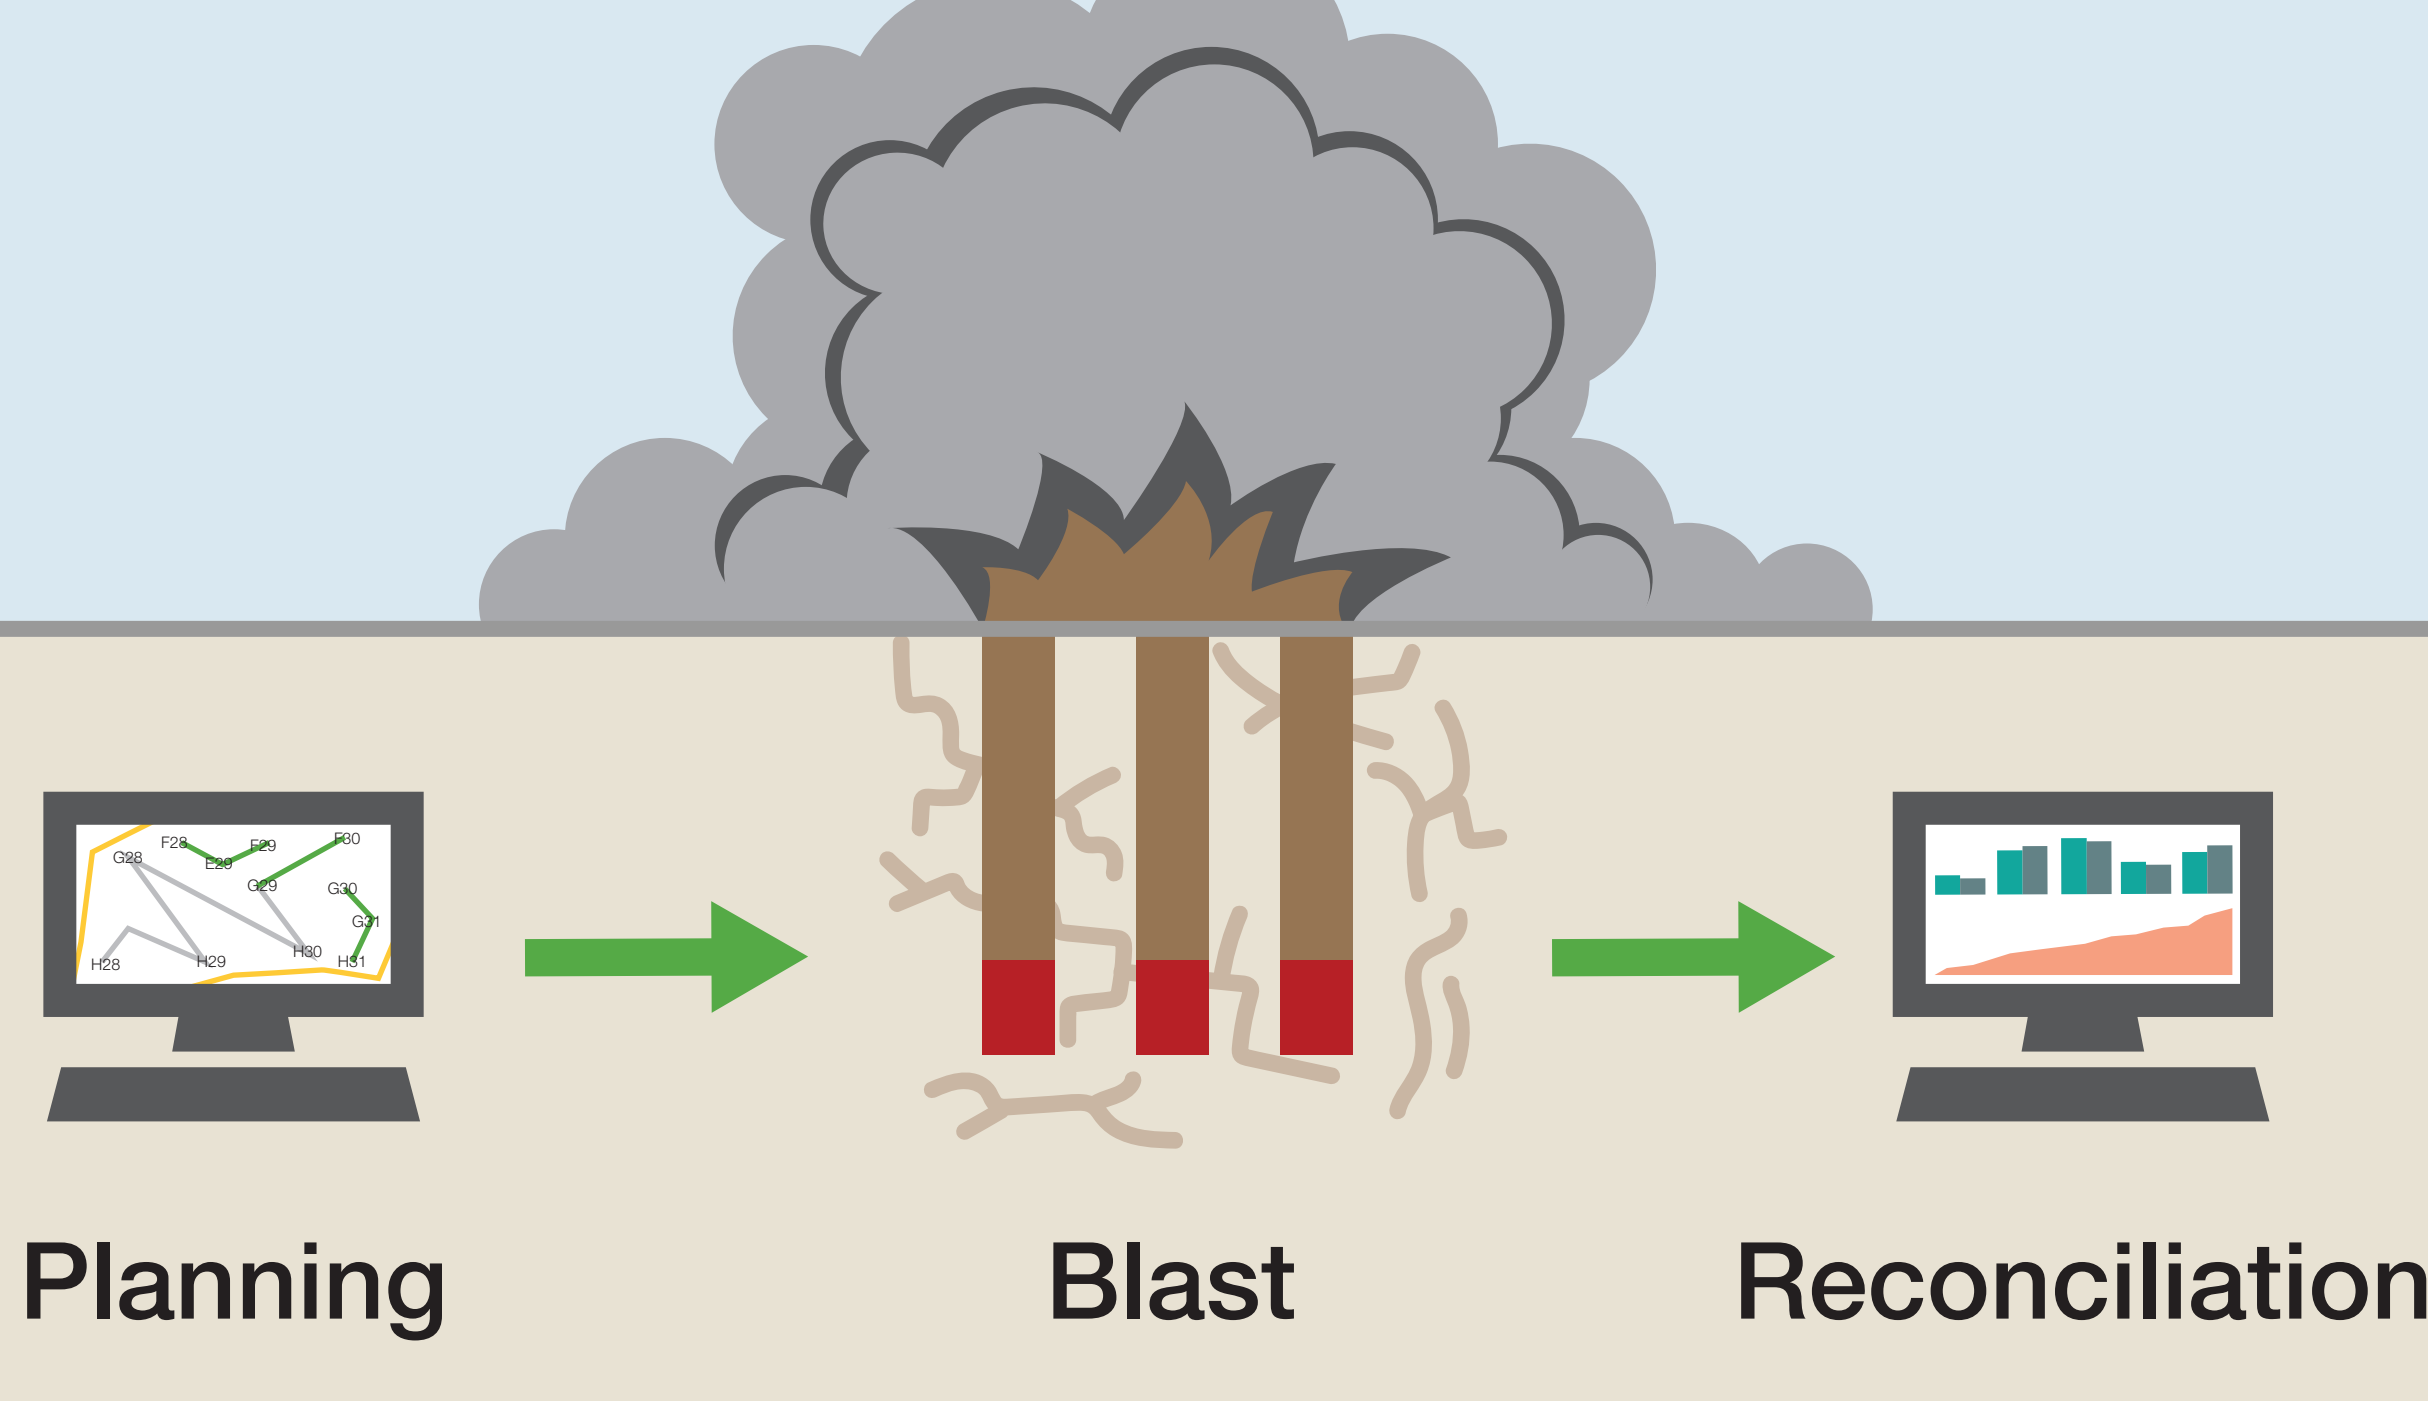

Interconnectivity

Enhanced communication in the field
Dynamically view and compare blast designs against field observations.

Integration of your blast process
Seamless integration of data across your entire blasting process.

Faster reconciliation

Centralized blast data makes it quick and easy to analyze what happened vs. what was planned.

Real-time capabilities

Track blast performance relative to milling throughput and improve your bottom line.

Accessibility

Easy to learn and operate for all types of users.
