Administrative Benefits

Streamlining infrastructure and technical support

- Cloud managed services remove need for on-premise infrastructure
- Unified licensing system reduces technical support on licensing systems
- Easily facilitate standardised licensing across sites and regions
- Backed by Amazon Web Services

Licence utilisation and management

- Simple administration of user groups and access to specific software/seats
- Monitor and analyse your users' software seat usage and support interactions
- Avoid risk resulting from loss or theft of dongles
- Customisable time spans for borrowing and inactivity timeouts

Simplified user administration

- Establish user and licence alerts to administrators
- Unify software download and distribution (self updating and software access)
- Control over software/user/group interactions with these services
- Control over user registration and activation
