

Mine Geology Seminar - Work smarter with Maptek

Thursday 9 may 2024 | 9:30am - 4pm | Perth CBD

9:30	Welcome	
9:40 - 10:15	Session 1 - Drillhole Planning	Discover the drillhole planning tools that can help improve your site processes and outcomes. Learn handy hints that ensure you get the most value from your software.
10:15 - 11:00	Session 2 - Domain Modelling	Gain a better understanding of the various modelling methods and when to use them to generate your best possible geological model. Discover the benefits of different approaches.
11:00 - 11:15	Morning break	
11:15 - 12:15	Session 3 - Grade Control	Guess the grade and profit and loss outcome! Examine the impact of ore block boundary definition and discover the tools that support smarter decisions. Explore the potential for automation and customisation of your site processes.
12:15 - 13:00	Lunch break	
13:15 - 14:15	Session 4 - Process Automation	See different types of automation in action. Learn how you can devise the best approach to streamline your operational practices.
14:15 - 16:00	Where to next?	Vote on our tools matrix and suggest refinements. Put forward your ideas for the future of geological modelling. Help Maptek develop the functionality you need for your short- and long- term success!
16:00 - 17:00	Networking drinks
